

DTM Dry Toner Label Stock

Wine Cream Paper (NNWC)

Description

Wine Cream Paper label material has been designed specifically for use in primary labelling of high and luxury goods with an old world image, e.g. wines, beverages, spirits and specialist foods. Made of tough 115 µm paper it comes with an topcoated surface which is suitable for printing by usual dry toner electrographic label printers, such as Primera's CX-Series, OKI's Pro10-Series and more.

Product Usage

All DTM Genuine certified dry toner materials are the ideal choice for labels printed on any electrographic label printer. Proper testing in the final application environment is recommended especially when used near water or chemicals. As with all pressure-sensitive materials, this product should be tested thoroughly under end-user conditions to ensure it will meet the requirements of the specific application.

Shelf Time

2 years when stored away from sunlight and heat, in a dark, dry place at a temperature of +20 °C with a relative humidity of 50%. Prolonged storage at higher temperatures and/or humidity levels will shorten the shelf life.

Technical Specifications

Face

Material: Woodfree matt uncoated paper with a laid textured surface

Basis Weight: 90 g/m² ISO 536

Thickness: 115 µm ISO 534

Adhesive

Material: Acrylic permanent with water wash-off characteristics

Liner/Backing

Material: White siliconised glassine paper

Basis Weight: 60 g/m² ISO 536

Thickness: 53 µm ISO 534

Performance

Minimum Application

Temperature: 0 °C

Service Temperature: -20 °C to +80 °C
