

Professional-quality color output fast print speeds!

Signature III[™]
CD COLOR PRINTER

New!

Signature III is a new, third-generation ink-jet CD color printer from industry leader **Primera Technology**. It combines the fastest print speed ever offered with the highest print resolution available in the world today: 1200 x 1200 dpi for a stunning 1.44 million pixels per square inch. This advanced technology delivers true photo-quality images along with incredibly crisp and clear text and graphics. With Signature III, you can create CD-Rs that reflect the professional image of your business!

PRIMERA
TECHNOLOGY, INC.

If you utilize CD-Rs for recording and storing data, software, music and audio or images, don't take chances with your labeling. Felt-tip markers can convey an unprofessional image and potentially damage your discs. Paper stick-on labels are difficult to apply and can ruin expensive CD-R media and CD-ROM drives. And other CD printers can be prohibitively expensive. But with the Signature III CD Color Printer, new from Primera®, you can create colorful, customized CD-R designs right on your own desktop at a price that is very affordable.

THE HIGHEST RESOLUTION IN THE WORLD.

Go ahead and compare. You'll find that Signature III's break-through 1200 x 1200 dpi print resolution can't be matched by ANY other CD printer available — even from printers costing thousands of dollars more! You can print full-color text, logos, graphics, photos and more with stunning detail and clarity. No matter what you're printing, the results will impress you and your customers.

And with Signature III, quality does not come at the expense of speed. A full-color CD with 100% coverage prints in just 68 seconds (in default 600 x 600 dpi print mode).

PRINT ONTO VIRTUALLY ANY PRINTABLE-SURFACE CD-R.

Signature III features a new and improved ink formulation. Color gamut has been increased over 35%, delivering incredibly bright, bold and realistic colors. It also prints onto the widest variety of printable-surface media ever. Images are highly durable and on many brands of CD-Rs dry immediately. Use CD-Rs from our Authorized Media Partners, listed below, or use our Signature-branded CD-R media with Tuff-Coat™ — a unique coating which makes printed discs highly water- and smear-resistant.

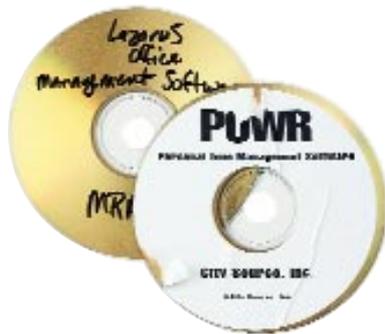

FULL SUPPORT FOR WINDOWS® USERS.

Signature III comes equipped with our CD-ID software for Windows 95/98/NT, making it easy for you to format your designs. You can also use any of your favorite Windows programs to create customized CD-R designs that make a statement about your business.

Markers and paper stick-on labels can look unprofessional and even damage your CD-R media and CD-ROM drive.

Signature III produces stunning, full-color CD-Rs with high-resolution text and bright, bold images and graphics.
