SWEETS 'n' SAVOURY SNACKS WORLD

Eddie brings colour and a personal touch to your confectionery

When thinking of food printers, the ones come to mind that print on wafer paper or icing sheets which must be glued to confectionery or baked goods. Unlike those printers Eddie prints full-colour photos and text directly onto the surface of white chocolate, candy, cookies, biscuits, macarons, marshmallows, and much more. Suitable food items can be up to 89 mm wide and will be dry and ready for sale immediately after printing.

Eddie makes the printing process fast and easy. The machine prints up to six print objects per minute, depending on the item size and actual print design. The included carousel tray holds 12 food items and rotates them to the print position. The printer pulls in one item at a time, prints and sends them back to the carousel – all automatically and hands-free.

Personalisation is all the rage in today's consumer and B2B markets. Eddie can produce new profits in commercial settings from chocolate and candy stores to bakeries, gift shops, hotels and tradeshows.

Applications for personalised confectionery and baked goods include birthday parties, baby showers, weddings, anniversaries, Christmas and holiday gifts, tradeshow giveaways and souvenirs.

Eddie is unique in the commercial food preparation business for many reasons, but none as important as for safety. Although edible ink printers have been sold and utilised in commercial applications such as photo cakes for more than a decade, none of them have been approved for this use by recognised, third-party certification organisations, making producer liability a serious concern.

Eddie was instead designed from the beginning to meet or exceed all regulatory requirements for the specific purpose as an edible ink digital printer.

The edible ink cartridge meets all FDA and EU standards for use as a food additive. The ink cartridge itself meets cGMP standards and the entire manufacturing and cartridge filling processes are FDA-compliant and cGMP certified.

Eddie is available directly from DTM Print, international OEM and solution provider and well-known for specialty printing systems.
